

KZN MANAGED FUND

AUGUST 2023

The KZN Managed Fund is a moderately aggressive fund that aims to achieve above average returns over the longer term.

The fund can invest across all local and foreign asset classes. The fund makes use of a blend of three good quality asset managers who have been given fully discretionary global balanced mandates. These asset managers have the freedom to select the allocation to each of these asset classes and the most attractive securities to invest in within each asset class. A portion of the fund is managed on a strategic asset allocation basis, where the long term allocation between the various asset classes have been set, taking into account the fund's long term aim. Specialist asset managers have been appointed to manage each of the asset classes and have the freedom to select the most attractive securities to invest in within each asset class.

Due to its relatively high allocation to growth assets (such as local and foreign shares and private equity), the fund has a high chance of capital loss in the short term, but is expected to achieve real growth of capital over the long-term. As a result, the fund is best suited to members who have a longer term (5 years or more) investment horizon.

The portfolio complies with the prudential investment guidelines set out in Regulation 28 of the Pensions Funds Act.

MONTHLY COMMENTARY

Markets declined in August before recovering slightly. Tensions heightened after Fitch downgraded the US credit rating, driving US real bond yields to their highest level since 2009. European natural gas prices shot up by nearly 40% due to potential disruptions in the global supply of liquefied natural gas from Australia. Concurrently, oil prices reached a nine-month peak, further intensifying overarching inflation concerns.

The Chinese economy remains of concern. In response to escalating concerns over deflationary pressures and a sagging property market, Chinese authorities intensified their yuan interventions to prevent swift depreciation, and the People's Bank of China announced cuts to its mortgage rates for the first time since the great financial crisis - but the market believes further stimulus is required. President Xi attended the BRICS summit in Johannesburg, where membership was expanded from five to eleven nations as top oil exporter Saudi Arabia joined the bloc along with Iran, Egypt, Argentina, Ethiopia and the United Arab Emirates in an ambitious push to expand global influence.

In the US, remarkable consumer endurance has maintained inflation above the 2% mark, prompting the US Federal Reserve to again underscore its commitment to curtailting it. Trump was booked on felony charges in Georgia and his mug shot went viral along with his popularity, highlighting the US presidential elections on the horizon.

The US remains resilient, and a cyclical manufacturing turnaround is possible. The tailwinds suggest good news over the coming months, but history suggests that the aggressive monetary tightening of the past year will eventually lead to an economic slowdown. While we expect inflation to remain sticky, it will fall along with growth as excess savings from Covid run out and China continues to export deflation. This is bullish for bonds and the dollar. As the global economy is not out of the woods quite yet, we remain cautiously positioned.

The FTSE/JSE CAPPED SWIX Index decreased by 4.8%, Industrials were down 5.1% and Financials dropped by 1.8%. The JSE All Bond Index declined by 0.2%, while the rand depreciated by 6.5% relative to the US dollar.
