

KZN ISLAMIC FUND

MAY 2024

The KZN Islamic Fund is a moderately aggressive fund that aims to provide steady long term returns and capital growth.

The fund is invested in a wide variety of domestic and international asset classes such as equity, sukuks and listed property. The selected asset managers have the freedom to select the allocation to each of these asset classes and the most attractive securities to invest in within each asset class.

The underlying investments will comply with Sharia requirements as prescribed by the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as well as the prudential investment guidelines set out in Regulation 28 of the Pensions Funds Act.

Due to its relatively high allocation to growth assets, the fund has a high chance of capital loss in the short term, but is expected to achieve real growth of capital over the long term. As a result, the fund is best suited to members who have a longer term (5 years or more) investment horizon.

This fund is suitable for Muslim investors requiring a Sharia-compliant portfolio appropriate for retirement schemes.

MONTHLY COMMENTARY

Equity bull market continues as central banks begin rate cuts. For the first time in its 128-year history, the Dow Jones Industrial Average rose above 40 000. Copper surged to its highest-ever level, rising above \$11 000 a ton. Markets have been supported by rate cuts in select markets, with Swedish Riksbank joining the Swiss National Bank in cutting its policy rate. Many emerging markets have also cut rates in 2024, including Brazil, Colombia, Mexico, Hungary and the Czech Republic. The European Central Bank and Canada are expected to cut in June, with the US only likely in September.

The bull market continues despite cooling US economic growth, even as inflation remains sticky. April's core consumer price index (CPI) fell to 3.6% year on year, in line with expectations. The US economy appears to be slowing, with a number of disappointing economic updates. However, the rise of the internet lifted US labour productivity by about 1%-1.3% per year from the late 1990s to the early 2000s, and AI could do the same in the coming years.

Heightened geopolitical risks have also continued: Suez Canal traffic remains 80% below December's volume, and Israel is expanding its military operations against Hamas in the southern Gaza city of Rafah after 1 million civilians evacuated. The global election calendar continues. South Africa's election results are in: the 58.6% voter turnout marked its lowest level in 30 years. The ANC lost its majority, dropping from 57.5% to 40.2%, with the MKP the standout winner, going from nowhere to 14.6%. We now await the final coalitions.

After April's home prices saw their biggest fall in a decade, Xi Jinping's government announced a multi-pronged approach in its most forceful attempt to rescue the Chinese property market. The plan will help mop up excess unsold homes, give developers revenue and provide affordable housing. At CNY300bn, the numbers are not big enough yet, but it has the potential to become a game changer.

For now, given the strong AI investment in the US and high levels of productivity growth, we maintain our overweight equity and overweight US positioning.

The FTSE/JSE Capped SWIX Index increased by 0.9%, Industrials were up 1.7% and Financials down 0.4%. The JSE All Bond Index rose 0.8%, while the ZAR/USD exchange rate ended the month unchanged.
