

KZN AGGRESSIVE FUND

SEPTEMBER 2025

The KZN Aggressive Fund is an aggressive fund that aims to maximise investment returns over the longer term. The fund maintains a high exposure to growth assets, such as local and foreign equities and gains additional exposure to growth assets via investments in local property and private equity. The fund's asset allocation is fixed and the fund makes use of specialist asset managers to select the most attractive securities to invest in within each asset class.

Due to its high allocation to growth assets, the fund has a high chance of capital loss in the short term, but is expected to achieve real growth of capital over the long-term. As a result, the fund is best suited to members who have a longer term (7 years or more) investment horizon.

The portfolio complies with the prudential investment guidelines set out in Regulation 28 of the Pensions Funds Act.

MONTHLY COMMENTARY

The gold price surged more than 10% in September on the risk of a US government shutdown, pushing the real (inflation-adjusted) gold price to an all-time high. Gold's weighting has reached 15% of the JSE All Share Index, nearly three times its 2006 peak; including platinum group metals, total precious metals now account for 22% of the SA equity market, pushing the South African resources sector to more than double year to date. Gold performed well in the 2018/2019 US shutdown, and the short-term rise in gold has likely been driven by investors seeking safe haven. Beyond the shutdown, emerging market (EM) central banks are likely to continue to buy gold and Trump will continue his attacks on the Fed, so gold's rally is likely to continue. However, the stretched price of gold has raised the risk of a short-term reversal.

While inflation in South Africa rose less than expected, to 3%, the South African Reserve Bank (SARB) kept rates unchanged, with SARB governor Lesetja Kganyago blaming "the serious dysfunction in administered prices".

This year's upside growth surprise is due to tariff hikes occurring more gradually than expected, with the observed US tariff rate only reaching 9.7% in July. As front-loading spending in the US slows, a weakening of labour income will occur just as tariffs squeeze purchasing power, with the effective tariff rate expected to reach 19% by year end. US real labour income is thus projected to decline in the coming months. Despite slower employment, inflationary pressures from tariffs and immigration-driven wage increases pose significant risks that could prematurely end the Fed's rate cut cycle, while the oil price spiked after US President Trump reversed his stance on Ukraine. Investment lead growth is supporting the economy for now and the Atlanta Fed's GDPNow model is spiking, suggesting GDP growth could reaccelerate to 3.3% in Q3. Cheaper energy, a weaker dollar, lower equity earnings yields and narrowing credit spreads are all stimulative for business activity.

Markets are very stretched and pullbacks are likely due to geopolitical risks or inflation. At this stage, the Fed continues to provide liquidity, and fiscal stimulus is much stronger than it should be at this point in the economic cycle, which suggests that any pullbacks will be shallow.

The FTSE/JSE Capped SWIX Index improved by 6.5%, as Resources soared by 28.1% and Industrials rose by 1.7%. Financials dropped by 1.6%, the JSE All Bond Index increased by 3.3% and the Rand strengthened 2.5% against the Dollar.
