

KZN MODERATE FUND

DECEMBER 2025

The KZN Moderate Fund is a 50% / 50% combination of the KZN Managed Fund and KZN Defensive Fund. It is a fund with moderate risk that aims to deliver real growth but with less volatility.

The portfolio is well diversified and invests across all local and foreign asset classes and makes use of good quality balanced asset managers and specialist asset managers within certain asset classes.

Over the longer term returns are expected to be less volatile but at the same time lower than for a typical balanced fund, because of the 50% exposure to the KZN Defensive Fund.

Due to its moderate allocation to growth assets, the fund has a moderate chance of capital loss in the short term, but is expected to achieve real growth of capital over the long-term, albeit lower than that of a typical balanced fund. As a result, the fund is best suited to members who have medium term (3-5 years) investment horizon.

The portfolio complies with the prudential investment guidelines set out in Regulation 28 of the Pensions Funds Act.

MONTHLY COMMENTARY

Global markets closed out 2025 against a backdrop of diverging growth dynamics and a notably weaker US dollar. President Trump's punitive tariff regime disrupted global trade flows, while the resulting 10% decline in the US dollar - its weakest annual performance since 2017 - emerged as a key driver of market performance across asset classes.

Monetary policy and reciprocal tariffs dominated investor focus in the US. Following three interest rate cuts in 2024, the Federal Reserve delivered a further 75 basis points of easing in 2025, supporting equity markets and contributing to ongoing dollar weakness. This accommodative stance appears set to continue, with current Fed Chair Jerome Powell expected to be replaced by Kevin Hassett, a perceived Trump loyalist, who has indicated that he sees no tariff-related threat to the Federal Reserve's 2% inflation target.

Over the year, strong US equity market returns were underpinned by resilient corporate earnings and continued enthusiasm around artificial intelligence-related investment. While market leadership broadened modestly beyond mega-cap technology stocks, performance continued to largely be driven by companies at the forefront of the AI revolution. For South African investors, however, the strong 16% US dollar return from the S&P 500 was significantly diluted by the 14% appreciation of the rand, reducing returns to 2.2% in local currency terms.

The strengthening rand coincided with a powerful rally in commodity markets. Gold and silver recorded their strongest annual gains since 1979, while copper rose by the most in a decade. This commodity-led momentum propelled the FTSE/JSE Capped All Share Index to a 43% return for the year, delivering another period in which domestic assets outperformed their global counterparts. The JSE All Bond Index gained 24.2% - the second consecutive year of strong double-digit returns for the domestic bond market.

Emerging markets also benefited from the weaker US dollar, with the MSCI Emerging Markets Index returning 17.3% in rand terms, outperforming the MSCI World Index by 11% for the year.

Looking ahead to 2026, investors face an environment of uncertain global growth and divergent inflation dynamics. With the US cutting rates while more hawkish sentiment prevails elsewhere, conditions appear supportive of a delay in any meaningful US dollar recovery.

The FTSE/JSE Capped SWIX Index improved by 4.6%, while Industrials gained 1.8% and Financials rose 7.3%. The JSE All Bond Index increased by 2.7% and the Rand strengthened 3.3% against the Dollar.
