

# KZN ISLAMIC FUND

MARCH 2026

The KZN Islamic Fund is a moderately aggressive fund that aims to provide steady long term returns and capital growth.

The fund is invested in a wide variety of domestic and international asset classes such as equity, sukuks and listed property. The selected asset managers have the freedom to select the allocation to each of these asset classes and the most attractive securities to invest in within each asset class.

The underlying investments will comply with Sharia requirements as prescribed by the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as well as the prudential investment guidelines set out in Regulation 28 of the Pensions Funds Act.

Due to its relatively high allocation to growth assets, the fund has a high chance of capital loss in the short term, but is expected to achieve real growth of capital over the long term. As a result, the fund is best suited to members who have a longer term (5 years or more) investment horizon.

This fund is suitable for Muslim investors requiring a Sharia-compliant portfolio appropriate for retirement schemes.

## MONTHLY COMMENTARY

Escalation between the US/Israel and Iran has driven crude oil to \$120 per barrel (/bbl). Equity, currency and bond markets across Europe and emerging economies have sold off sharply. The dollar has strengthened and gold has softened, reaffirming the dollar's safe-haven status in a high-geopolitical-risk environment.

US forces have bombed Iran's Kharg Island, the country's principal crude export hub. Iran has struck its Gulf neighbours hard, removing 12 million barrels per day (mb/d) of supply and effectively closing the Strait and impeding the 20 mb/d that ordinarily transits it. In response, the International Energy Agency released 400 million barrels - larger than any prior drawdown. The US has also permitted purchases of sanctioned Russian oil, estimated at 124 million barrels. However, these measures combined amount to only 26 days of Hormuz-replacement supply. Yemen's Houthi militia have also officially entered the war, which threatens to close the key Bab al-Mandab Strait. Israel struck the Iranian portion of the South Pars/North Dome gas field, the largest gas field in the world, which it shares with Qatar. Iran retaliated with widespread attacks on oil and gas infrastructure, impairing 17% of Qatar's liquid natural gas capacity for three to five years.

Natural gas prices have almost doubled year-to-date. JPM research shows energy prices close to \$100/bbl through midyear (moderating towards \$80/bbl thereafter), which would raise consumer prices by 1.0% and reduce growth by 0.8%. The Strait of Hormuz also carries critical flows of chemical and petrochemical products whose supply impairment has global implications for food, agriculture and semiconductor manufacturing.

From a cyclical perspective, the key question is whether the oil shock will trigger a major global downturn. The answer will ultimately depend on the magnitude and duration of the energy shock. Historically, a sustained doubling of oil prices to around \$130 for two months has been the threshold for a recession. The US has strong incentives to seek a relatively swift resolution to the conflict in the Middle East, but it will take time for supply to return to the Strait even if a ceasefire happens immediately. Given the uncertainty of the outlook, we have reduced our overweight in emerging markets back to neutral, including South African equities.

The FTSE/JSE CAPI Index declined 10.6%, while Industrials lost 5.0% and Financials dropped 9.8%. The JSE All Bond Index retreated 6.8% and the Rand weakened 7.5% against the Dollar.

## ACTUAL ASSET ALLOCATION AS AT 31 DECEMBER 2025
